Structure & Character:

1. Molding and positioning working procedure of products are all equipped with electric differential device to conduct adjustment without stopping machine.
2. Conveyance of jumbo roll in production uses vacuum absorption to steady material tension.
3. Driving system consists of gearwheel device, universal couplings and synchronous belt with high driving accuracy and low mechanical consumption.
4. To-cut blade is installed in bevel angle with fast cutting and long usage lifetime.
5. Material unwinding unit is equipped with synchronously pushing unit to stable material tension and fasten running speed.
6. Components of bracket, work faceplate, driving backboard are strong in a frame structure with strong anti-seismic, good stability and no shaking.
7. Driving components are installed on backboard of equipment to facilitate adjustment and maintenance and protect high-speed operation against shake.

Main Technical Parameter:

1. Production rate:
 - a. Designed production speed: 80m/min
 - b. Stable production speed: 50 ~ 70m/min
 - c. Finished products rate > 98% (Except glue applicator breakdown or exchanging material)
2. Machine power:

Main machine 120KW (380V, 50Hz) (Include glue applicators.)
Crusher 11~ 75KW (For customers option)
3. Products Specification (L x W mm): (450 ~ 1200) x (450 ~ 950)
4. OverallSize of equipment (L x W x H m): 15 x 3.5 x 3
5. Weight of equipment: about 35t
