#### History of adult incontinence products

Adult incontinence products are a relatively recent invention. In fact, until the early 1970s mothers had no real alternative to classic cloth diapers. Adult diaper pants have the advantage of being soft, comfortable, and made of natural materials. The disadvantages of old cloth diapers are their relatively poor absorbency and the fact that they have to be laundered. Disposable underwear was developed to overcome these problems. The materials of earliest diapers did not absorb very much moisture for their weight. Consequently, diapers made from these materials were extremely bulky. Nowadays, adult incontinence products were developed to address this issue.

Adult diaper pants can lead and disperse urine forward and backward to permeate and absorb. It is in body contoured design for a comfortable snug fit.

The front tape of adult diaper pants can be adjusted freely. Its attached smooth surface offers special care for patients who lie on bed for a long time and can not control their urine. We offer an impressive selection of adult incontinence products for women as follows: adult diaper pants, sanitary underpad, nursing pads, disposable underpads, adult underpad, incontinence pads, disposable underwear, thick adult diapers, incontinence pants as well as others.
